

## News Bulletin

<b>Date</b>	<b>May 3<sup>rd</sup>, 2019</b>
<b>Subject</b>	<b>CubelQ Announces Availability of SDN List Viewer™</b>

CubelQ announces the availability of **SDN List Viewer™**.

When a large number of **PCS™ OFAC Reporter** cases have been generated the end-user would like to know in which extend the loaded to **OFAC Reporter database SDN Lists** have been updated. Presumably, the large number of new OFAC Reporter cases is the result of comparing existing customer base with an extensive SDN Lists update with new and updated records.

**SDN List Viewer™** is a web based database software system with web browser user interface and MS SQL or MS SQL Express RDBMS that connects to **PCS™ OFAC Reporter SDN Lists database** and displays to the end-user the new or updated Sanction Lists records.
