Subject	CubelQ Announces Adverse Media Database Language Enhancements

CubelQ Announces **Adverse Media Database Language Enhancements**.

ComplyAdvantage™ Adverse Media Database is enriched with two new languages, **Dutch and Italian**, and therefore media published in these languages will be processed powered by ComplyAdvantage™ **Neuro-Linguistic Programming - NLP** machine learning technology. ComplyAdvantage™ is unique in being able to process media in native languages, and this release will add Dutch and Italian to the existing native language coverage of English, French, German, Spanish, Portuguese, Russian, Arabic, Chinese, and Japanese.

- Profiles created from **Dutch & Italian** media will begin to be created **from Wednesday August 5th 2020**.

ComplyAdvantage™ Adverse Media Database is upgrading also four (4) of the existing Adverse Media languages to ensure that they are using state-of-the-art NLP deep learning technology. This release will further improve our capability for:

- **Spanish**, release scheduled for **August 10th, 2020**
- **French**, release scheduled for **August 10th, 2020**
- **German**, release scheduled for **August 12th, 2020**
- **Portuguese**, release scheduled for **August 12th, 2020**

How this will impact you:

If you are (a) not searching or monitoring adverse media or (b) you include adverse media in your search filters or (c) you are monitoring searches with adverse media in the search filters you may receive (a) higher than normal amount of alerts for names (new AKAs added to Sanction, PEP or Warning profiles via adverse media information) and (b) larger number of true adverse profiles especially for customers in regions with Spanish, French, German, or Portuguese media.

These alerts will **gradually normalize**. The specific level of increase in your alerts will be highly dependent on your particular searches and search settings, as well as your regional focus.

If you have any questions please contact your Client Services or Relationship Manager or our Support Help Desk via e-mail to: sw.support@cubelq.gr.
